

# Project Planning Rural Water Governance Scorecard

|         |        |
|---------|--------|
| Name    | Office |
| Project | Date   |

The intention for this survey is to ask questions during the design phase to address water system governance in the new activity. “Yes (fully)” answers are worth 3, “Yes (Partly)” are worth 1 and “No” are 0. This guide is not intended to provide a “passing” or “failing” grade, however it should provide a governance lens in which to view the site and suggest potential interventions for improving services. The Water Governance scorecard is framed in USAID’s PITA framework and compliments the GROWS TATE framework. **For more information on additional resources, please see [Section 2](#) of the Toolkit.**

| Accountability Questions   | Yes (Fully)    | Yes (Partly) | No          | Notes | Additional Resources                             |
|--|----------------|--------------|-------------|-------|--|
| A1 Will water systems rely on a market-based approach for allocating water (pay-for-service)?  |                |              |             |       | E-Payments, Electric Taps                        |
| A2 Will the people/organizations responsible for service provision (Maintenance/ Operations/Management?) have access to technical and administrative support groups? |                |              |             |       | Subscription Maintenance, Technical Associations |
| A3 Will a trained individual be responsible for book-keeping of the service provider?  |                |              |             |       | Training & Capacity Building, Audits             |
| A4 Will the system undergo regular maintenance checks and repairs by a trained (qualified) individual?   |                |              |             |       | Subscription Maintenance                         |
| A5 Will the project require a written agreement documenting ownership, roles and responsibilities for the water system?  |                |              |             |       | Legal Registration & Formal Contracting          |
| A6 Will a recourse be implemented if obligations to the service provider are not met (e.g. users fail to pay for services)?  |                |              |             |       | Collective Payment                               |
| A7 Will a recourse be implemented if obligations to the community are not met (e.g.: provider fails to meet quality/quantity agreements)?                            |                |              |             |       | Legal Registration & Formal Contracting          |
| <b>Sub-Totals:</b>   | <b>__x3</b>    | <b>__x1</b>  | <b>__x0</b> |       |  |
| <b>Accountability Total:</b>   | <b>____/21</b> |              |             |       |  |

| Participation Questions  | Yes (Fully)    | Yes (Partly) | No          | Notes | Additional Resources                       |
|--|----------------|--------------|-------------|-------|--|
| P1 Will vulnerable members of the community be able to access water regardless of ability to pay?  |                |              |             |       | Social Costing                             |
| P2 Will the community have access to water service providers who can deliver services in spite of challenges related to remote locations, low income, cultural difference, etc.? |                |              |             |       | Participatory Planning, Community Meetings |
| P3 Can women be elected to water leadership positions?   |                |              |             |       | Participatory Planning, Community Meetings |
| P4 Will community members be (including participation by marginalized groups - potential users) involved in the water system planning process?                                   |                |              |             |       | Participatory Planning, Community Meetings |
| P5 Are marginalized groups represented on planning, decision-making and oversight committees?  |                |              |             |       | Participatory Planning, Community Meetings |
| P6 Are women owned businesses and technicians able to access resources provided to services providers - finance, training, icensing, etc.?                                       |                |              |             |       | Micro Financing                            |
| <b>Sub-Totals:</b>   | <b>__x3</b>    | <b>__x1</b>  | <b>__x0</b> |       |  |
| <b>Participation Total:</b>  | <b>____/18</b> |              |             |       |  |

**GOVERNANCE RESEARCH ON WATER SYSTEMS (GROWS)**

| Inclusion Questions     |  | Yes (Fully) | Yes (Partly) | No          | Notes          | Additional Resources  |
|-------------------------|--|-------------|--------------|-------------|----------------|---|
| I1                      | Will a local (community or government) water system inspector ensure functionality of the system?  |             |              |             |                | Audit, Umbrella Org., Franchising, Publication of Performance Info. |
| I2                      | Will community meetings be held between service providers, users, and government officials that allow user participation?                        |             |              |             |                | Community Meetings  |
| I3                      | Will service providers have access to financing if needed (particularly in areas without economies of scale, where there are start-up barriers)? |             |              |             |                | Microfinancing, Franchising   |
| I4                      | Are there mechanisms for community members to voice water service concerns to service providers and local government authorities?                |             |              |             |                | Community Meetings  |
| <b>Sub-Totals:</b>      |  | <b>__x3</b> | <b>__x1</b>  | <b>__x0</b> |                |   |
| <b>Inclusion Total:</b> |  |             |              |             | <b>____/12</b> |   |

| Transparency Questions     |   | Yes (Fully) | Yes (Partly) | No          | Notes          | Additional Resources                    |
|----------------------------|---|-------------|--------------|-------------|----------------|---|
| T1                         | Will the service provider be required to be legally registered and working under a contractual framework?                       |             |              |             |                | Legal Registration & Formal Contracting |
| T2                         | Will there be well-defined, agreed-upon, and well-known tariffs for water?  |             |              |             |                | Contingent Funding                      |
| T3                         | Will service providers be required to pass a financial audit?   |             |              |             |                | Audit                                   |
| T4                         | Will agreed upon and publicly known performance and quality standards be required of service providers?                         |             |              |             |                | Publication of Performance Information  |
| T5                         | Will a system of information around water system performance be made publicly available (through avenues that reach all users)? |             |              |             |                | Dashboards                              |
| T6                         | Will a system of technical and financial monitoring be established to ensure proper operations?                                 |             |              |             |                | Technical Training & Capacity Building  |
| <b>Sub-Totals:</b>         |   | <b>__x3</b> | <b>__x1</b>  | <b>__x0</b> |                |   |
| <b>Transparency Total:</b> |   |             |              |             | <b>____/18</b> |   |
